PROFILE

An ecosystem science and sustainability major with an interest in the field of environmental justice and advocacy, while in school I have been involved in on campus and community outreach, including volunteering and have worked as the Director of the Student Sustainability Center in the School of Global Environmental Science at CSU. In a professional setting, I bring passion and empathy in order to contribute to helping communities pragmatically practice sustainability. I seek to utilize my expertise in organizations focused on grassroots efforts and apply my core competencies which include

- **Leadership and teamwork experience** with facilitating outreach and volunteer events
- **Educated and curious student**, always looking to learn more about current issues
- **Advocacy driven** with experience in writing proposals and researching policies
